

Please find information on the coherent rare earth information processing summer school below. There are a number of action items. Reading this now may save you considerable time at a later stage.

1. Please check at the webpage <http://doodle.com/uyw3qumep5xv3xv2> that our notes regarding your room are correct. Send an e-mail to [Stefan.Kroll@fysik.lth.se](mailto:Stefan.Kroll@fysik.lth.se) if something is wrong. At the webpage above you also have the name of all participants and which days they will be at the conference.

2. If you have any special dietary requirements regarding the food please communicate this as soon as possible to [info@frostavallen.se](mailto:info@frostavallen.se)

3. Public transportation between Copenhagen airport and the summer school is limited so we will also investigate or arrange alternative transportation; therefore please send an e-mail to [gjan.li@fysik.lth.se](mailto:gjan.li@fysik.lth.se) and inform about your arrival time at Copenhagen airport.

4. Still there are public transportation alternatives for reaching Frostavallen from Copenhagen Airport. If your arrival time fit the train times below public transportation is probably a very good alternative.

There are trains Monday 25<sup>th</sup> to the village of Höör in Sweden leaving Copenhagen airport at 8.26, 11.26, 12.26, 13.26 and 16.26. The train ride to Höör takes (according to schedule) 54 minutes. 25 minutes later there is a bus (Ringbus 441) leaving the train station reaching the bus stop "Frostavallen" after 6 minutes. (Thus if you for example take the train 16.26 you will reach Frostavallen at 17.51.) When you get off the bus (next to a parking space) the restaurant complex is roughly in front of you (slightly to the left) and the hotel is straight forward to the right.

4. If you are interested in a lab tour the laboratories in Lund on Monday or Friday, please send an e-mail to [gjan.li@fysik.lth.se](mailto:gjan.li@fysik.lth.se)

6. A warm evening meal is served at the restaurant in Frostavallen Monday the 25<sup>th</sup> at 7 pm. In case you arrive after this time or long before this time it may be useful to know that the conference location is in a recreational area in the woods where there are no shops or restaurants and it is generally not possible to get food except at the scheduled summer school program break and meal times.

7. An updated schedule can be found at the summer school web page <http://www.cipris.eu/index.php?id=176>

8. The lecturers have provided some pre-reading material and will largely plan their lectures assuming that the audience is familiar with this material. Links to the pre-reading material can be found at the summer school webpage.

The conference site is situated in the woods close to a small lake. There are nice walking and running paths. There is a small gym and sauna as well as table tennis and pool tables.
